Portfolio | 7816074525 | vinjamurichandrasekhar123@gmail.com | Github | LinkedIn

PROFESSIONAL SUMMARY

Driven Software Engineer skilled in building responsive web applications and database-driven systems using Python, Flask, JavaScript, and MySQL. Experienced in designing REST APIs, relational database schemas, and interactive user interfaces. Combines strong technical foundation with analytical problem-solving and systematic debugging to deliver scalable solutions.

SKILLS

- Languages & Core:** Python, JavaScript (ES6+), SQL, HTML5, CSS3, Data Structures & Algorithms, OOPs
- Web & Backend:** Flask, REST APIs, JSON Parsing, HTML/CSS, Web Architecture
- Databases & Analytics:** MySQL, Relational Database Design, Power BI
- Tools & Platforms:** Git, GitHub, Postman, VS Code, Vercel, AWS
- AI & Concepts:** AI/ML Fundamentals, LLMs, Conversational AI, Debugging, Problem Solving

PROJECTS

Smart Office Digital Twin Automation | Python, Flask, MySQL, HTML, CSS, JavaScript

- Architected a real-time web dashboard using Flask and JavaScript to monitor IoT office metrics, task updates, and employee data.
- Developed RESTful APIs integrated with an optimized MySQL schema, improving query response speeds for dynamic dashboard feeds.
- Structured indexed database tables and relational queries to ensure 100% data accuracy across high-volume operational records.

EV Charging Station Simulator | HTML5, CSS3, JavaScript (ES6+)

- Engineered an interactive EV charging station simulator utilizing JS state management to handle real-time battery status animations.
- Implemented event listeners and asynchronous DOM updates to render live charge progress and responsive control interactions.
- Designed a high-resolution, full-viewport responsive layout tailored for high-impact web presentations across multi-viewport devices.

Cinematic AI Chatbot Interface | HTML5, CSS3, JavaScript

- Built an animated conversational interface featuring smooth CSS transitions and dynamic message rendering.
- Executed asynchronous JavaScript (Fetch API/Promises) to manage simulated AI response pipelines and dynamic user interactions.
- Maintained modular, component-based source code using Git version control and GitHub Pages for continuous deployment.

WORK EXPERIENCE

US Staffing Operations Executive | Smart Client US IT Innovations | May 2024 – Present

- Automated monthly payroll and invoicing workflows across large spreadsheet datasets, maintaining 100% data accuracy.
- Resolved complex data discrepancies by performing root-cause analysis on timesheet metrics and operational reports.
- Partnered cross-functionally with IT recruiters and external consultants to optimize daily workflow efficiency.

EDUCATION & CERTIFICATIONS

B. Tech – Electrical & Electronics Engineering | NRI Institute of Technology, Guntur | 2018 – 2024 | 65%

Certifications: Python Full Stack Development (NxtWave) | Python Essentials I & II (Cisco) | Python 5-Star (HackerRank)
